

Pasture and Livestock Management Workshop

Texas AgriLife Research and Extension Center

Overton, Texas

March 30 – April 1, 2010

The Workshop is targeted for the novice or inexperienced rancher, and covers the basics of soil fertility and forage establishment, management, and utilization. Additionally, several aspects of cattle management including basic animal husbandry, genetic selection, nutrition and feeding, and reproduction are covered. Although the workshop is targeted to novice producers it provides information that is relevant and valuable to both novice and more experienced producers. The class date is March 30 - April 1, 2010. The Workshop starts on Tuesday morning at 8:00 and concludes on Thursday at noon, with about half the time spent in classroom and the remaining time in the field demonstrating various “how to” methodologies of planting, calibrating sprayers, pasture assessments, castration, vaccination, de-horning calves, and more. The class is limited to 50 participants. Workshop attendees have ample time to visit with Research and Extension faculty to discuss various aspects of forage production and livestock management.

A Workshop manual containing information on pasture and livestock management is provided. Breakfast and break refreshments along with two noon and two evening meals are included.

Lodging is available at several Kilgore motels (approximately 12 miles). For your convenience, their phone numbers are:
