

**Pasture and Livestock Management Workshop – 2014
Texas A&M AgriLife Research and Extension Center, Overton
Texas A&M System
March 25 – 27, 2014**

The Pasture and Livestock Management Workshop is focused on providing information on soil fertility, forage establishment, management, and utilization. Additionally, several aspects of cattle management including basic animal husbandry, genetic selection, nutrition and supplementation, and reproduction are covered. The Workshop provides information that is relevant and valuable to both novice and more experienced producers. Activities start on Tuesday morning, March 25 at 8:00 am and conclude on Thursday, March 27 at noon. About half the time is spent in classroom and the remaining time is in the field demonstrating various “how to” methodologies of planting, calibrating sprayers, pesticide application, pasture and stocking rate assessments, castration, vaccination, de-horning calves, trapping hogs, and more. Workshop attendees will have ample time to visit one-on-one with Research and Extension scientists to discuss various, specific aspects of forage production and livestock management as it pertains to their operation. Three CEU recertification credits will be awarded to attendees. A Workshop proceedings containing information on soil-forage-pasture-livestock-wildlife management is provided. Breakfast and break refreshments along with two noon and evening meals of barbeque and rib-eye steaks are included.

For your convenience, phone numbers for several Kilgore motels (12 miles) are listed:
